

XM radio is a great alternative to regular broadcasting due to the signal that we receive while in the car or at home. I drive an hour to work and listen to both regular radio and also to XM. It is easier to get updated traffic on XM due to there not being any commercial breaks or a delay for other news. I don't feel that the reports are any better than regular programming, it is just easier to access.

Don't allow traffic or any other programming on XM Radio to be affected. We the listener should have the final say!!

Thank you!!
